

QUIET SONG

CLASSIC WIT
4.3%

There are just 12 notes between any octave, then the octave repeats. All any artist can offer this world is how they see those 12 notes. That's it. Having something to say and a way to say it so that people listen is why we are here. This classic wit sings quietly to an audience often looking the other way. You may not need this song year round, but you'll miss it when it's gone.
